Friday-Sunday, March 24-26, 2017

**Improving Restorative Results with Crown Lengthening: A Lecture & Hands-on Program**
Saturday, April 1, 2017

Take advantage of these high impact programs for your practice.
*Register early—enrollment is limited.*
Benefits of Attending
Today’s dentists find that this hands-on course will build on your current knowledge and skills while giving you several opportunities for practice with contemporary endodontic techniques. You will benefit from hands-on experience and the sharing of information with peers on many endodontic problems. You will have the opportunity to attend several workshops related to your individual needs. Each workshop is designed to help you develop your skills in the diagnosis and management of endodontic cases. You will also be able to ask questions, share ideas with your peers, and receive individual feedback.

Who Should Attend
This course is ideal for dentists who are new to endodontics, as well as those who want to update their skills. It is particularly useful for general dentists who want to improve their skills in managing endodontic cases.

Registration
This course is offered in two sessions: one in February and one in March. Registration fees are $2,295 for dentists and $2,950 for non-dentists. The balance is due by February 3, 2017. A $595 deposit is due at the time of registration.

Refund Policy
A full refund will be made if you cancel at least one month (30 working days) prior to the program. If you cancel less than one month prior to the program, your registration fee will be credited to a future course or to another registrant. No refunds will be issued for cancellations made after the registration deadline.

Reimbursements
You may choose any of the following methods to register for courses:

Registration online via our secure web site at www.dentistry.umn.edu.
Mail to our registration form along with your check or credit card information.
Call (612) 624-8159 or (612) 624-1518 and use your credit card to register.
Fax your registration and credit card information to us at (612) 624-0159.

Everyday Endodontics
A Hands-on Program for the General Dentist
Friday-Saturday, March 3-4, 2017
University of Minnesota School of Dentistry • Minneapolis, Minnesota

Benefits of Attending
You will want to take advantage of this rare hands-on opportunity in contemporary pediatric dentistry. Enthusiastic and experienced instructors will share with you everything you need to know about pediatric endodontics today and will guide you through several hands-on workshops relevant to your practice. In addition, you will benefit from the individual attention from faculty and close interaction with full course participants offered by the small class size. After this practical program, you will return to your practice with the knowledge, confidence and skills to treat young children using proven-day methods and techniques.

You will receive useful information on how to:
• assess a child’s caries risk and treatment plan accordingly.
• determine when to initiate pulpal therapy, restorations or extract primary teeth.
• diagnose and manage developing malocclusion in the primary and mixed dentitions.
• manage premature tooth loss.
• select the best restorative options and materials—all things considered.
• assess and manage traumatic injuries in the primary and mixed dentitions.
• reduce fear and anxiety and provide pain control for the young patient.
• manage behaviorally challenging children and their parents.
• determine when to treat in your practice and when to refer.

Course Director
This course is under the direction of Scott B. McClanahan, D.D.S., M.S., M.E.C., Professor and Director, Graduate Program and Division of Endodontics, Department of Restorative Sciences, University of Minnesota School of Dentistry and includes faculty and residents from the Division of Endodontics, University of Minnesota School of Dentistry.
