Dental Hygiene Refresher: An Online & Hands-on Clinical Program

About the Course
This powerfully blended online and patient-based program will give you the confidence to re-enter dental hygiene practice or simply build on your existing knowledge base and patient treatment skills. You will attain up-to-date and clinically relevant information along with the skills required for traditional dental hygiene practice today. The program is designed to maximize the time you will spend treating patients under the guidance of supportive and experienced dental hygiene instructors/mentors at the School of Dentistry. The blended format includes online learning activities, traditional classroom instruction and clinical participation. The online session is self-paced and will be available from April 10 to May 5, 2017, allowing you to prepare in advance for the face-to-face classroom instruction and multiple patient treatment sessions.

Benefits of Attending
You will learn how to:
- determine which medical/dental concerns will affect your patient treatment.
- uphold the requirements of HIPAA regarding patient’s protected health information.
- provide assessment including vitalis, and cancer screening, probing and oral screening using digital sensors and periodontal risk status of your patients.
- follow current recertification, infection control and radiation standards.
- select individualized home products for disease management.

You will also gain simulated and live-patient experience with:
- instrumentation (hand, ultrasonic, implant), including sharpening techniques.
- digital radiographs using sensors and phosphor plates.
- patient communication and educational techniques, including motivational interviewing.

Who Should Attend
Dental hygienists who want to re-enter dental hygiene practice or who want a comprehensive review and multiple live patient experiences including everything you need to know for daily dental hygiene practice.

Educational Methods
The online component includes video lectures, demonstrations, and quizzes to help assist your understanding of the material. Faculty support will be available as you work through the online modules.

The hands-on clinical component includes illustrated lectures, discussion, demonstration, preclinical simulation and patient treatment. All supplies, patient and instruments will be provided.

Course Instructor
The course is under the direction of Kari Kempeal, J.D.H, B.S.C., Teaching Specialist, Division of Dental Hygiene, Department of Primary Care, University of Minnesota School of Dentistry and includes faculty from the Division of Dental Hygiene.

Testimonials
What past attendees have liked about this program:
“1 was extremely nervous before the hands-on portion, however when I got here all staff were wonderful and extremely helpful so thank you for your help and giving me my confidence back.”
“1 came here to refresh skills I hadn’t used in 7 years. I got that and regained my confidence 100%.”
“1 was an incredible course! Not only did I refresh my skills but learned so many new things. Excellent instructors, fun, supporting and talented.”

Beth Kraft, Libertyville, IL

Refund Policy
A full refund will be made if you cancel at least one month (30 working days) prior to the program. If you cancel less than one month prior to the program the 359.5 deposit will be deducted from your refund.

Parking
Parking is included. Information on parking will accompany your course registration.

Local Anesthesia: A Hands-on Training Program

About the Course
Administering local anesthesia allows dental hygienists to offer more comfortable care during periodontal debridement, root planing and other clinical services where root and gingival sensitivity are present. Dentists may also delegate to dental hygienists the responsibility of anesthetizing some of their restorative patients. This program will review basic knowledge of head and neck anatomy, pharmacology, and medical history evaluation relevant to local anesthesia. In addition, you will gain information and skill with the anesthetic agents and techniques as you practice injection techniques on each other.

Benefits of Attending
Through multiple experiences you will learn how to:
- locate anatomic landmarks for each injection site.
- select appropriate local anesthetic agents for each patient.
- adjust your use of local anesthesia when medical contraindications or concerns are present.
- prevent, recognize and manage complications associated with local anesthesia.
- select and prepare the equipment needed.
- provide comfortable and safe maxillary injections including: supraperiosteal, anterior superior alveolar, middle superior alveolar, posterior superior alveolar, nasopalatine and greater palatine.
- provide comfortable and safe mandibular injections including: mental/infraorbital, inferior alveolar, lingual, buccal, Gow-Gates, PDL and intracapital.

Who Should Attend
Graduates of any accredited dental hygiene program who need to complete the required educational training in order to administer local anesthesia. Please note, you will practice injection techniques on each other; pregnant women are asked not to participate in this course.

Educational Methods
Illustrated lectures, video, demonstration, discussion, clinical participation.

Tuition
5195 (A $395 deposit is due at the time of registration.)

Credits
42.5 fundamental; 2 core (Infection Control - 1; Record Keeping - 1)

Minnesota Credits:
42.5 fundamental; 2 core (Infection Control - 1; Record Keeping - 1)
