Benefits of Attending
You will benefit from the volume and variety of information presented during this rapidly paced course. Topics included throughout the program focus on new ideas in dentistry that relate directly to your daily practice. Seven knowledgeable speakers will share current information and answer your specific questions.

Objectives
You will come away from this program better prepared to:
• recognize indications and contraindications for soft tissue grafting in areas of gingival recession.
• explain the latest research findings related to detecting oral cancer in its earliest stages.
• implement CAD/CAM dentistry into your practice utilizing digital impressions with chairside or laboratory systems.
• recognize how common manipulations applied to digital radiographs may impact diagnosis.
• apply digital technology to analyze and design the patient smile line in treatment planning.
• identify drugs associated with MRONJ and describe current management strategies.
• access the MN PMP database and explain how and when to use it in your practice.

Who Should Attend
Dentists and dental team members who want to keep up to date with the latest science, guidelines, techniques and technologies impacting clinical dental practice.

Educational Methods
Illustrated lectures and panel discussions.
