COMMUNITY OUTREACH PROGRAMS
Students complete 9-11 weeks in outreach providing care in Health Professional Shortage Areas (HPSA) in urban community health clinics and in rural communities in Minnesota, North Dakota, South Dakota, and Montana. Through the community outreach program, students enhance their clinical skills as they treat a diversity of patients with a variety of oral care needs and develop a broader understanding of their social responsibilities as oral health professionals.

SUMMER RESEARCH FELLOWSHIPS
Ten students from each incoming DDS class are selected to take part in the summer research program where they get involved in dental and craniofacial research, clinical research, or dental public health research under the guidance of a faculty mentor. Summer research fellows receive a $4,000 stipend for their 10-week time commitment.

INTERNATIONAL EXTERNSHIPS
Fourth year dental students have the opportunity to undertake part of their clinical education in one of the countries where the School of Dentistry has exchange programs: Norway, Denmark, the Netherlands, and Germany.

TEAM-BASED EDUCATION
Dental students are educated in a team-based setting learning alongside dental hygiene and dental therapy students. Students in all three programs work in comprehensive care groups to deliver care to patients as a dental team.

DUAL DEGREE PROGRAMS AVAILABLE
DDS/MPH
Unique opportunity to integrate the practice of dentistry and public health to identify and solve community health problems in areas of oral health. Jointly offered by the School of Dentistry and the School of Public Health. The program can be completed in 5 years – student will matriculate into the School of Public Health for the first year, deferring admission to the dental school.

DDS/PhD
Prepares students to meet the challenges of interdisciplinary research and advancing technologies. Students will need 8 years to complete both the DDS and PhD. PhD students major in Oral Biology; other graduate programs may be possible. Students start in the PhD program before beginning the dental program. Students can apply concurrently or apply to the dental program during their first or second year of their PhD education.

2019-2020 TUITION

Resident*
1st Year: $38,479  
2nd Year: $51,214

Non-resident*
1st Year: $71,284  
2nd Year: $94,531

*Projections are good faith estimates for planning purposes. Tuition and fees are subject to change without notice.
PREREQUISITE COURSEWORK

At least 87 semester credits or 130 quarter credits of liberal arts courses are required from an officially accredited U.S. or Canadian college or university. A minimum of 23 credits must be earned at a four-year college or university. Required courses must be completed with a C or above by the end of the regular academic year (i.e., spring) for entry the following fall and must include:

1. English - 8 semester credits
2. General Biology or Zoology with lab - 8 semester credits
3. Physics with lab - 8 semester credits
4. General Chemistry with lab - 8 semester credits
5. Organic Chemistry with lab - 8 semester credits
6. Biochemistry - 3 semester credits
7. Math - 3 semester credits
8. Applied Human Psychology - 3 semester credits

All science courses, with the exception of biochemistry, must include both lecture and lab instruction. Online labs are not accepted. Courses in biology, chemistry, biochemistry, and physics may be considered outdated if taken more than five years before the time of application.

SELECTION FOR ADMISSION - HOLISTIC REVIEW

The School of Dentistry DDS Admissions Committee selects students based upon their competitiveness in the following areas:

• Quality of academic performance (GPA)
• Completion of prerequisite courses
• Completion of preferred elective coursework:
  - Cell Biology, Histology, Human Anatomy, Human Physiology, Immunology, Microbiology, Genetics, Art (drawing, sculpture, etc.), Public Health
• Dental Admission Test (DAT) results
• Letters of recommendation (3 required)
  - 2 from college science/math faculty
  - 1 from supervisor (paid or volunteer position)
  - 1 from a dental professional (recommended, not required)
• Personal statement on desire to become a dentist
• Statements of orientation to dentistry and contribution to the program and diversity
• Volunteer experience in healthcare and dentistry
• Community service experience
• Leadership experience
• Work experience
• Dental shadowing experience (minimum: 50 hours)
• Research experience (recommended, not required)
• Extracurricular activities (athletics, music, etc.)
• Interview performance
