11th Annual Robert J. Feigal Symposium
Clinical Updates in Children’s Dental Care

Friday, September 15, 2017
Continuing Education & Conference Center
St. Paul, Minnesota
6.5 Credit Hours

Practical updates on:

- Universal adhesives
- Resin infiltration for enamel white spot lesions
- Pediatric oral surgery
- Common oral lesions
Build your skill set with this widely attended annual symposium. Benefit from the collective knowledge of three talented speakers with an impressive combination of research, academic and clinical experience.

**BENEFITS**

Discover how to:
- apply techniques with adhesive materials that produce long-term satisfactory results.
- manage enamel white spot lesions and incipient carious lesions with resin infiltration.
- recognize the indications and potential complications associated with various pediatric oral surgical procedures.
- manage common soft tissue lesions in infants, young children and teenagers.

**INTENDED AUDIENCE**

This clinically focused course is designed to benefit pediatric dentists as well as general dentists and dental team members who treat children.

**EDUCATIONAL METHODS**

Illustrated lectures and discussion.

“Very informative and relevant to my practice.” 
~ *Past Participant*

“Varied topics from experts in the field.”
